Sector: **Civil Engineering**

Marlborough Highways believe all roads lead to the P50!!

Marlborough Highways are a dynamic, independent civil engineering company with over 25 years' experience in every aspect of traditional and contemporary civil engineering work.

We have a pool of over 480 multi-skilled, longstanding staff, and our own dedicated in-house Project Managers. Members of our leadership team get involved from day one and are always on-hand to provide exceptional customer care.

Our core services include road surfacing, reactive maintenance, highway maintenance, highway engineering, surface treatments, winter maintenance, bridge installation, structure maintenance, cliff stabilisation, gully cleansing, traffic management, street lighting, emergency calls outs, road marking, and urban redevelopment.

Our business is predominantly work in Essex, London area and the South of England.

"I came across the P50'S on LinkedIn and saw lot of positive reviews on the equipment. We just moved into a new facility and we felt it the perfect opportunity to bring in some innovation." says Mathew Nebu, QHSE Manager for Marlborough Highways.

"We knew we would get improved serviceability and ease of maintaining with the P50 fire extinguishers."

"We are also reducing our costs by switching to the P50 fire extinguisher, because we can maintain them, thus eradicating the need for an annual service by a 3rd party servicing company." enthused Mathew.

Jason was very quick to respond to all my queries and we needed the delivery in a very short span of time and Jason did not disappoint. The installation and hand over were very smooth.

We would gladly recommend Eco Fire Safety.
